

The new KR P System 65000 MAX

For horizontal
coupling of the KRINNER
screw foundations (V168)

Cost effective machine

With the KR P system we provide you a cost-effective alternative of a hydraulic excavator attachment - as usual engineered by KRINNER.

Drive by choice

For the installation of KRINNER ground screws you can choose from different alternatives between 15,000 Nm and 65,000 Nm.

Increased speed of installation

By using the KR P system, it is possible to install pre-installed extended KRINNER ground screws. Pre-installation allows the speed of installation to be increased. This leads to enormous time savings.

Real time data transfer

The Doku Kit guarantees real-time data transfers. **Nothing stands in the way of automatic report generation.** The control takes place via the KRINNER App.

TECHNICAL DATA

Type	65 000 Max
Maximum operating pressure	320 bar
Torque factor	170 Nm/bar
Deadweight approx.	480 kg
Torque capacity	32500 - 65000 Nm
Hydraulic pressure range	160 - 320 Bar
Flow capacity	100 - 280 L/min
