

The KRINNER test equipment TP 50

For easy load tests up to 50 kN

Affordable test equipment

The tripod offers you a cost effective alternative to execute load tests up to 50 kN in well known high KRINNER-quality.

Force transducer at your option

For executing your tensile tests you can use the force transducer of KRINNER or another customary force transducer with a suitable measuring range. Regarding to this the KRINNER tripod offers you a maximum of flexibility.

Suitable for all KRINNER Series

We recommend doing load tests for every project. You can use the tripod for all of our ground screws excluding the products of the V114, V140 and V168-Series.

Easy and low weight

The tripod is convincing with its easy application and its low weight. You can transport it easily in your car's boot or as bulky luggage by plane.

TECHNICAL DATA

Spindle stroke	250 mm
Permitted maximum load	50 kN
Installation space for force transducer (approx.)	40 cm *
Tare weight approx.)	24 kg

* Dimensions may vary situational.
